Висновок

В результаті виконання лабораторної я додала 2 нових класи до проекту: CoordinateJT і Main1_2. Main1_2 містить методи для роботи із заданим рядком, CoordinateJT описує координати і напрямок та містить методи для роботи із ними. Я перевірила працездатність додатку та коректність даних, що виводяться, на AVD та власному пристрої.
